

Course in Coal Science

October 8-14, 2017 – Xuzhou, CHINA
China University of Mining and Technology, Xuzhou & Beijing

MOTIVATION AND OBJECTIVE

Coal production is at an all-time high and coal will remain a key component of the global energy mix in the foreseeable future. However, formal training in coal science is increasingly difficult to obtain, due to the retirement of many leading teachers and researchers over recent years.

For the benefit of young coal scientists, students, and the global coal industry, this one-week course, presented by international leaders in different branches of modern coal science will provide essential background information and practical training about coal science, to every attendee from academia, industry and government agencies.
